① KURUSHIMA KAIKYO OHASHI (KURUSHIMA Strait Big Bridge)

This Bridge is about 4 kilos length at the world first 3 suspension bridge that links the Shikoku mainland to OSHIMA. The height of the tower has 65 meters of the height of the bridge girder at 184 meters from the surface of the sea and can pass through even a big ship easily.

② THE LEG OF THE BRIDGE

About 100,000t weight of iron is used for this KURU Island Strait Big Bridge. This is quantity of the iron for 25 of Tokyo Tower. Quantity of the concrete is about 480,000 m³ and it's the same as 100,000 concrete mixer cars, too.

③ HACHIMAN WHIRLPOOLS

The one of the Japan's three biggest fast flowing streams with NARUTO Strait and KANMON Strait, the violent tide of KURUSHIMA Strait reach 10 knots per an hour, drop 2 meters in the maximum of the high and low tide difference. Some huge vortexes to be called "HACHIMAN-Whirlpools" more than a diameter of 10 meters at the time of flood tide occur.

④ NAKATO ISLAND TIDE SIGNAL STATION The NAKATO Island tide signal station was designed for the first time in Japan in 1909.

What was used in the first tide signal station in this Japan says with a roof truss type and can tell it about information with a red circle and a black square mark. A black square board becomes the top at the time of South Ocean Current, and the board of red round shape suffers from the top at the time of North Ocean Current.

⑤ HASHIHAMA BAY

HASHIHAMA Bay is box-shaped bay about 1 kilo in length width 300 meters in the best shipbuilding city in Japan. Large and small cranes of the shipbuilding company rise in the HASHIHAMA Bay, and the scene that the repair of the ship and a new ship are built is looked at.

⑥ KURU-SHIMA

KURU-SHIMA is the island where about 1km circumference is small. It is known as a stronghold of KURU-SHIMA Murakami Pirates. In addition, because KURU-SHIMA is protected in the fast flowing stream, and the whole island is the site of castle, it is a precious historic spot.

⑦ O-SHIMA

At the time of Russo-Japanese War, the trace of a fortress built for attack of Russia Navy is left. This fortress sign possesses 28 centimeters battery / headquarters / barracks / ammo / a power station and an approximately complete institution. In addition, it is said Japan alone, and this institution is the valuable historic spot where it is had for while a stone and a brick institution keep then form. 2500 camellia and 1000 cherry blossom trees planted around the historic sot.

O-SHIMA is the island where is most suitable for natural walk, sea bathing, surf-fishing and camping.

⑧ UMA-SHIMA

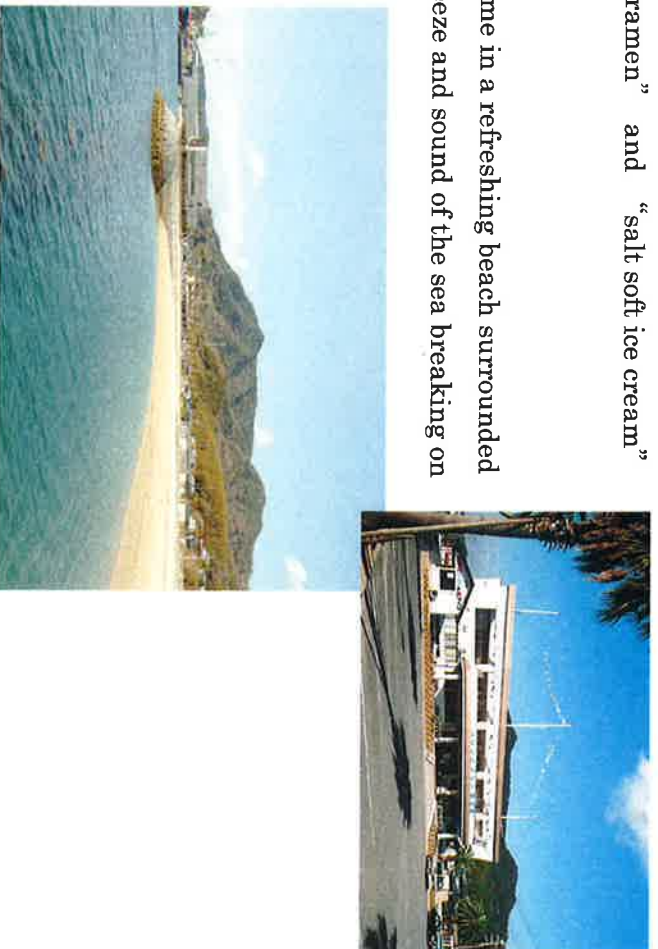

UMA-SHIMA is the island where there was the grazing land of the horse of the IMABARI feudal clan in old days. In the days of Edo, grass grew thick in the whole island and brought up a lot of horses for IMABARI feudal lords. In addition, the south slope of the island is warm and floriculture is prosperous and can enjoy a flower of four seasons by a comfortable climate that there is not a frost by the present.
